

FARM EMERGENCY ACTION PLAN

Natural disasters can strike at any time, so it's crucial for livestock farmers to be prepared both before and after a storm. A farm-specific Emergency Action Plan helps farmers make proactive decisions to protect their farm, livestock, and buildings in the event of a disaster.

Planning ahead for hazardous situations - such as power loss or extreme weather conditions - could help protect your family and minimize the impact on your farming business.

The best plan is to have a plan.

FARM	DETAILS
Farm Name	
Full Addresss (including postcode)
